

SAMIHA VAHORA

Full Stack Developer

Vadodara, India | samihavahora71@gmail.com | [linkedin.com/in/samiha-vahora-9792a632a](https://www.linkedin.com/in/samiha-vahora-9792a632a) | github.com/samihavahora05

SUMMARY

Final-year B.Tech Computer Science student specializing in Full Stack Web Development with expanding expertise in AI/ML Engineering. Hands-on experience building and shipping production software during a full stack internship, including a fully working HR Management System and the company's official website (frontend and backend), alongside independent projects such as an AI-powered insurance matchmaking platform with semantic search and an on-device AI inference Android app. Proficient in React.js, Next.js, Node.js, Express.js, PHP, Laravel, MySQL, Python, and Kotlin.

SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Flutter (Dart)

Backend: Node.js, Express.js, PHP, Laravel, Supabase (Auth, Edge Functions), REST APIs, Axios

Database: PostgreSQL (pgvector), MySQL, SQLite, Firebase

AI / ML: YOLOv8, TensorFlow Lite, Scikit-learn, TensorFlow, pgvector Semantic Search, AI Engineering (Udemy, in progress)

Tools & Platforms: Razorpay API, Docker, Jetpack Compose, Android Studio, Git, GitHub, VS Code

EXPERIENCE

Full Stack Web Development Intern -- BLUEBOXX DA Pvt Ltd

- Built the company's HR Management System (HRMS) end-to-end as a fully working production application, covering role-based dashboards (Admin/HR/Manager/Employee), org metrics, audit trail, leave and task management, and live notifications -- live at hrms.blueboxx.in.
- Independently built BLUEBOXX DA's official company website end-to-end, both frontend and backend, and continue to own it as an ongoing main project.
- Worked across the frontend of BLUEBOXX DA's IT training platform (courses, internships, jobs, and expert 1-on-1 sessions), including UI components and design/animation elements.
- Collaborated with the software development team as it expanded outreach toward the US market for white-label and partnership work.

PROJECTS

InsurMatch -- AI-Powered Insurance Agent Matchmaking Platform

github.com/samihavahora05/insurmatch

- Built a full-stack platform connecting clients with insurance agents through an AI matchmaker that ranks agent profiles using pgvector cosine similarity over query embeddings.
- Designed a graceful fallback to client-side keyword matching when the embedding service is unavailable, ensuring the matchmaker always returns results.
- Implemented Supabase Auth with Row Level Security, an agent directory, consultation booking, and separate client/agent dashboards; containerized the full stack with Docker for one-command local setup.

Object Detection Android App

github.com/samihavahora05/ObjectDetection

- Trained YOLOv8 Nano on a custom dataset, converted it to TFLite, and integrated it into a Kotlin Android app for real-time on-device inference with no internet connection required.
- Built an AI product scanner that identifies packaged food items via live camera and returns ingredient information.
- Optimised the frame-by-frame inference pipeline using Jetpack Compose UI and managed the full ML lifecycle from data preparation through quantisation and deployment.

EDUCATION

B.Tech -- Computer Science & Engineering, ITM (SLS) Baroda University, Vadodara

| 01/2024 - 05/2027 | CGPA: 8.43

Diploma -- Computer Engineering, MSU Polytechnic, Vadodara

| 06/2021 - 05/2024

CERTIFICATIONS

- Advanced AI/ML & Deep Learning, SAP Analytics Cloud & ABAP on BTP -- Code Unnati, SAP & Edunet Foundation (ID: CU26_32276)
- Jetpack Compose & Kotlin for Modern Android Development -- Google
- 8x Google Skill Badges (Cloud & App Development) -- Google
- AI Engineering -- Udemy

KEY ACHIEVEMENTS

- Social Media Manager, GDG On Campus Vadodara
- Certificate of Participation -- "Innovation-2K25" National Project Competition, PES College of Engineering (Oct 2025)
